

MOHAMMED HAFEEZ QUALANDAR SOUDAGAR

Bangalore, India | +91 7019017552 | mohammedhafeez1707@gmail.com | LinkedIn | GitHub

Professional Summary

Computer Science graduate with skills in C, C++, Python, HTML, and CSS. Gained practical exposure to Machine Learning through a 6-month internship at Contriver, and currently building on this with ongoing Data Science and AI/ML training at Besant Technologies. Applied these skills in academic projects including an NGO resource management system and an Android application security analysis framework. Passionate about problem-solving, and emerging technologies such as Machine Learning, AI, IoT, and Blockchain. Seeking an entry-level opportunity to apply technical skills and contribute to real-world software solutions.

Technical Skills

- **Languages:** C, C++, Python
- **Web:** HTML, CSS (Basics)
- **Tools:** GitHub, MS Excel, MS Word
- **Database:** MySQL
- **Concepts:** Machine Learning, IoT, Blockchain

Education

Rao Bahadur Y. Mahabaleshwarappa Engineering College, Bellary	2022 – 2026
<i>Bachelor of Technology (B.Tech), Computer Science and Engineering</i>	<i>CGPA: 8.25</i>
SMIORE Vyasapuri Composite PU College, Vyasanakere	2021
<i>12th Grade</i>	<i>74%</i>
K.S.P.L English Medium High School, Hospet	2019
<i>SSLC</i>	<i>78%</i>

Professional Training

Besant Technologies, Bangalore	Ongoing
<i>Data Science and AI/ML Training</i>	
• Currently learning Data Science, Artificial Intelligence, and Machine Learning concepts. • Gaining hands-on experience with Python, NumPy, Pandas, and Scikit-learn for data analysis and model development. • Working on real-world datasets and projects to improve analytical and problem-solving skills.	

Projects

NGO Resource Management System

- Designed and developed a web-based management system for NGOs to handle donations, campaigns, and volunteer records.
- Implemented modules for resource tracking, campaign monitoring, and volunteer management to improve operational efficiency and transparency.

Framework for Static Analysis of Vulnerabilities in Android Applications

- Developed a framework for automated static security analysis of Android applications by integrating a custom analysis workflow with the MobSF (Mobile Security Framework) tool.
- Utilized Docker for containerization and seamless integration, enabling efficient vulnerability assessment, report generation, and security testing of Android APK files.

Interactive Ping Pong Game

- Developed a browser-based game with keyboard controls and score tracking using HTML, CSS, and JavaScript.

Experience

Contriver	6 Months
<i>Machine Learning Intern</i>	
• Learned Python programming, Machine Learning concepts, model training techniques, Deep Learning, and Neural Network fundamentals. • Collaborated with team members to develop real-world projects and gain practical software development experience. • Worked on data pre-processing, model building, and performance evaluation as part of project development. • Enhanced presentation, communication, and teamwork skills through regular project demonstrations and technical presentations.	

Achievements & Certifications

- 2nd Place – Coding and Debugging Competition. (College)
- 2nd Place – Web Development Competition. (college)
- Participated in an IoT Workshop. (College)
- Completed C Language Training Program. (Codechef)
